*FOR FAST, EFFICIENT AND FOOLPROOF VOLUME TEST & TAG*

# SUPAPAT FOR THE BIG JOBS

## STANDARD SUPAPAT

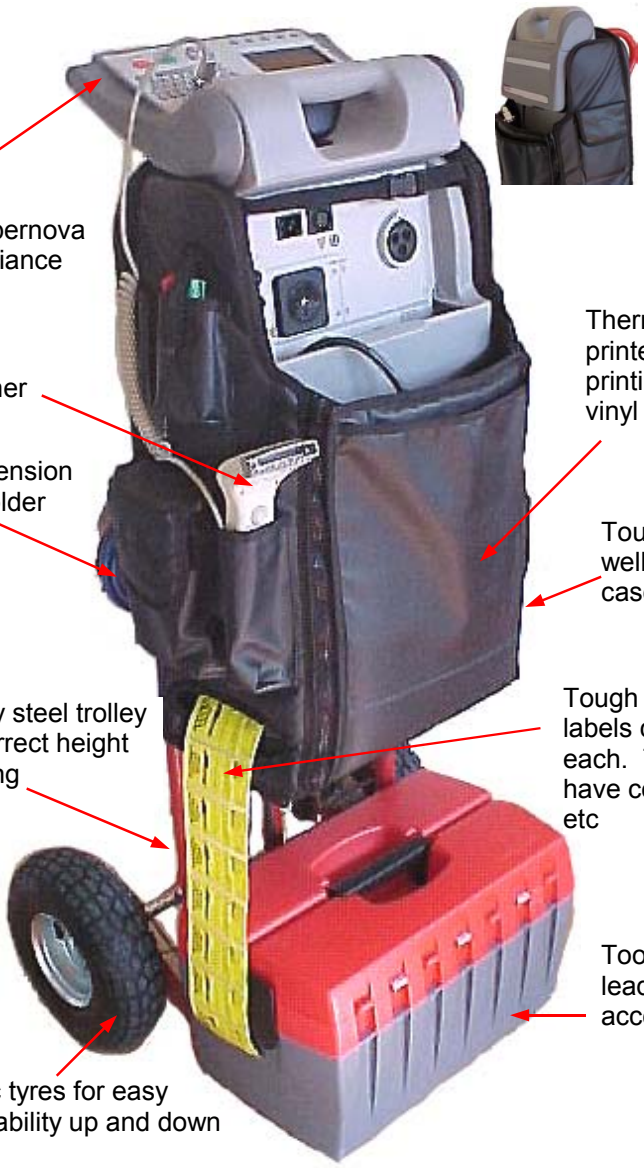
- Supernova
- Thermal Vinyl Label Printer
- Scanner
- Steel Trolley
- Extension Cord
- Removable strong
- Fully padded bag for Supernova

This SupaPAT uses the Supernova Portable Appliance Tester and is coupled together with a high spec technically advanced transfer printer capable of producing VINYL test labels that are bar coded automatically. This set up makes the large volume testing job a breeze.

The whole system fits onto a two wheeled trolley with a toolbox fitted to the bottom for those necessary tools and accessories.

**Labels actual size.**

Available in Lime Green, Bright Yellow, Bright Blue, Orange and white
**Also Available**: Plastic overlays for even greater durability.



The SupaPAT is very manoeuvrable and stable and is fitted with an extension lead and holder.

Obviously this advanced system is not the cheapest PAT Tester on the market – but if you want fool proof, ultra fast testing for large volumes of portable electrical appliances, then this is for you – when you consider these tough vinyl labels only cost 17c each it will not take long before the tester pays for itself.
