

Handheld Lightweight Manual PAT

Metro 6201A Appliance Tester

\$1195 + GST

A Portable Appliance Tester (PAT) performing four functions to ensure the safety of Class I & Class II electrical appliances with the ability to measure mains voltage.

Readings are displayed on a large liquid crystal display (LCD) showing actual testing values, below which are four LEDs which give a clear **PASS** or **FAIL** indication.

This tester allows you to undertake testing to meet the requirements of AS/NZS3760

The 6201A is a good basic entry level portable appliance tester for low volume applications where hand writing of tags and manual recording of information is all that is required.

The large digital readout allows the actual readings, rather than just a PASS or FAIL result to be recorded

Standard Set:

- Metro 6201A PAT Tester
- Power cord
- Test leads with alligator clip
- Flat test probe (black)
- Lead for extension lead testing
- Cord case & shoulder strap
- Instruction manual

Specifications:

Earth Bond Resistance Test

Measuring Range	0 ~ 15.00Ω
Measuring Current	10A AC (Nominal Value)
Accuracy	±3%rdg±5dgt

Insulation Resistance Test

Rating	250V/20MΩ
Rating	500V/20MΩ
Measuring Range	0 ~ 19.99.00MΩ
Accuracy	±2%rdg±3dgt

Leakage Current Test

Measuring Range	AC 0.1~ 19.99mA
Accuracy	±3%rdg±5dgt

AC VOLT Mains Voltage Check

Measuring Range	207~ 264V
Accuracy	±2%rdg±3dgt

Weight: 1.2kg (tester only) Dim:185Lx167Wx89D mm

Also available to complete your package..
